## bio

nomu. is a Seattle-based hyperpop artist and producer. Outside of collaborations, he writes, records, produces, mixes, and masters everything himself, and has released all of it independently - most recently the 2025 debut album **Sequence 01** and singles with crusey and scrobaby. The past year brought 3.6 million Spotify streams and 56,000 monthly listeners, with no label or management behind him. He came up in the 2019-2020 digicore scene alongside dolly, SEBii, and SHYSHY, and performs with live autotuned vocals over realtime glitch and datamosh visuals he coded himself.
